

高耐熱EPDMシール

High heat resistance EPDM seal

180°Cを超える超高耐熱性を持つEPDMシールを実現

Achieved EPDM seals with ultra high heat resistance exceeding 180°C.

高耐熱EPDMワイヤーシール
High heat resistance EPDM wire seal

■180°Cを超える領域で、ゴム弾性を維持

Maintaining rubber elasticity in the range exceeding 180°C.

■EPDMはゴムの中でもCFPが低く、将来的にバイオマスグレード、リサイクル材使用製品も提供可能
EPDM has a low carbon footprint among rubbers, and it will also be able to offer products using biomass grades and recycled materials in the future.

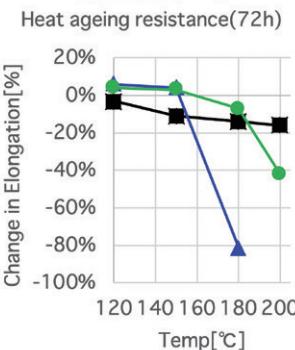

■黒色以外にも着色可能

It can also be colored in addition to black.

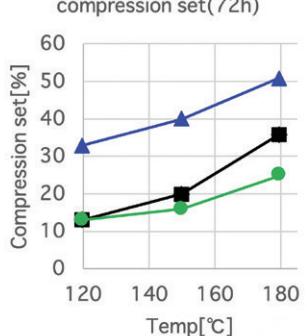

■シリコーン ▲EPDM ●高耐熱EPDM

耐熱老化性(72h)
Heat ageing resistance(72h)

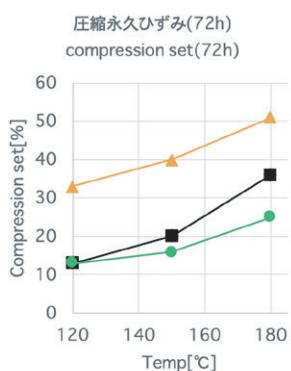

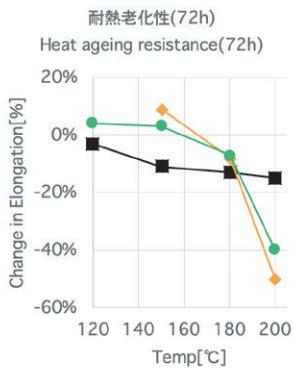

圧縮永久ひずみ(72h)
compression set(72h)

Bio-EPDMの適用により高耐熱の物性は保持しながら、更なるCFP低減が可能

By applying bio-EPDM, it is possible to maintain high heat resistance properties while further reducing the carbon footprint.

■シリコーン ●高耐熱EPDM ◇高耐熱EPDM+bio-EPDM
